

RAHUL CAJETAN D'COSTA

Development Team Lead

(+91) 953-891-4603 | Bangalore, Karnataka India. PIN – 560067

rahuldc999@gmail.com | <https://www.linkedin.com/in/rahul-dcosta/> | <https://github.com/rahuldcosta>

SUMMARY

Lead Software Engineer with 10+ years of experience building and scaling distributed, API-driven backend systems. Focused on Java (8+), Spring, and microservices for 6+ years, delivering high-performance retail and rule-based platforms in cloud environments. Proven ability in search systems (Lucene), event-driven messaging (Kafka, GCP Pub/Sub), and cloud-native services on Google Cloud Platform (GCP). Recognized for strong ownership, leading ambiguous initiatives from POC to production, and resolving complex cross-team production challenges. Fosters clarity, accountability, and psychological safety while mentoring engineers and driving engineering excellence..

SKILLS

- Programming Languages : Java 8+, C, R programming, Python(basics), Groovy
 - Domain Knowledge : Airline, Hotel, GDS, Rule Engine ,Corporate Travel
 - Frontend : HTML5, CSS3, Bootstrap3, Javascript ES5 ,JQuery
 - Backend/API : Microservices ,SOAP, REST, Spring MVC, SpringBoot, Lucene, Kafka/GCP PubSub
 - Database : MySQL, Oracle SQL, BigQuery
 - Framework & Tools : GCP (Google Cloud), Solr, Camel,, Quartz, TDD, TestNG, Junit, Sonar, Veracode, Jenkins, Rundeck, Rally, Maven, Git, Jira, Agile, Scrum
-

WORK EXPERIENCE

Development Team Lead

Sabre, Sep 2022 - Present

Lodging Retailer (LR) -Corporate Preferencing (Java 8, Microservices, Spring, GCP, Streaming)

- **Led end-to-end development of a high-scale, view manager rule-driven filtering engine** using multi-attribute evaluation, supporting thousands of concurrent rules with low-latency performance.
- **Drove \$700K+ in annual recurring revenue** by enabling real-time property/rate suppression for enterprise clients and maintaining peak performance across **10,000+ data mappings**.
- **Directed the delivery of multi-factor deterministic ranking logic** (Rate Code, Client ID), utilizing complex signal integration to influence global hotel ranking for agency programs.
- **Designed a non-blocking, asynchronous analytics pipeline on GCP Pub/Sub**, ensuring zero impact on customer-facing response times while delivering structured JSON event streaming with high reliability for all rule evaluation engines.
- **Reused 80% of existing API's framework** previously implemented for property preferencing and enhanced it by writing modularized code for SOAP & REST versions.
- Mentored team members through regular code reviews and pairing sessions, resulting in a **50% decrease in technical errors** and improved overall code quality.
- Created a s2c to s1c Converter Template to streamline the process for migrating microservices components, **reducing manual effort by 50% and saving an estimated \$5,000 per year**
- Collaborated with members of the LGS Winglets tech community to identify areas of improvement within existing systems, **resulting in a 15% increase in user satisfaction and adoption rates**

Senior Software Developer

Sabre, Jun 2021 – Sep 2022

Lodging Retailer (LR) -Persona Based Subscription Model & Squatter Rates Engine (Java 8, Microservices, Spring)

- Refined code quality metrics by refactoring & fixing sonar issues and modularized old code reducing maintainability overhead in components which resulted in **23.4% rise in code quality**.

- Boosted shopping to booking ratio to **34%** by building squatter rates engine enabling exclusive rates to agencies having a contract with Sabre.

Contributor Software Developer

Sabre, Nov 2018 – Jun 2021

Lodging Retailer (LR) -Agency and Supplier Preferencing (Java 8, Microservices, Spring, Lucene, WCAG, HTML, JS)

- Implemented scalable & decoupled API's for property preferencing by writing modularized code for SOAP & REST versions which contributed to **50% of the project requirement**.
- Collaborated with UX designer to translate project requirements and business objectives into polished user interfaces with WCAG 2.0 compliant that **helped Sabre avoid \$50K in penalties due to Accessibility**.
- Achieved 100% CI/CD for NGHP-Content by migrating 2500 API automation test cases to a newer framework (Nimbus) & added a dynamic test data generation module which **saved QA test data efforts of 48hrs every release**.
- Was a pioneer in introducing a transformation for developers by showing the importance of TDD & Dev/QA Balance which helped **reduce QA testing load by 30%, improved Junit coverage/scenarios by 10%**, and allowed Developers to contribute in API Automation.

Associate Software Developer

Sabre, July 2016 - Nov 2018

Field Rule Engine for Checkout UI (Java 7, JavaScript, JQuery, Velocity, Bootstrap)

- **Mitigated 14K lines of custom JavaScript** by developing end to end solution for engine-controlled Alert & Modal popup as per Bootstrap 3 standards **which improved code maintainability by 40%**.
- Magnified automation efficiency by building a CI/CD reusable solution called **CFE Creator via XML** which took care of CFE (custom field editor element) creation during automation that **saved 30 minutes per Execution**.

Airline Seat Map Exit Row Booking Enhancements (HTML, Velocity, Java, WCAG, Shell)

- Boosted GetThere booking revenue by introducing Exit seat booking capabilities in GUI which **enhanced the seat availability by 20% and bring in extra \$ 5 million in revenue annually**.
- Developed all UI changes with Web Accessibility (WCAG2.0) compliance that **helped Sabre save \$200K in penalties due to Accessibility**.
- Amplified the entire GT team's productivity by inventing **Quick Build** which **reduced the monolithic application maven build wait time from 30 minutes to under 4 minutes** i.e. saving 2 hours/employee adding up to 350 extra hours per week for Road Map items.

Software Developer Intern

Sabre, Jan 2016 - July 2016

Hotel Relevance Engine (Hadoop, Oozie, Java, Spark, Shell Script, Cloudera VM)

- Developed a log extractor service to filter relevant parameters for the Data Analytics process using Shell script and Cloudera VM which helped **reduce processing time from 2 hours to 20 minutes i.e. 600% faster**.
- Automated all processes for Engine functioning using Apache Oozie Workflow Scheduler **reducing manual effort by 90%**.

Associate Plants Operations (SAP, Excel, Word)

SESA Sterlite Limited, July 2011-June 2013

- Digitalized Iron Ore production data in SAP tool daily which helped to keep track of inventory stock with 100% accuracy.
- Created data visualization in Excel for daily basis Iron Ore stock for Managers

ACCOMPLISHMENTS

- 2025 : Awarded 2nd Place in Global Hackathon for Dynamic Sponsored Properties
- 2018: Presented Web Accessibility and Cross platform Development for UI at GIDS 18 Summit, IIS, Bangalore
- 2018: Presenter & Conducted 6 hr Bootstrap 4 workshop for students at QUARK 18, Bits Pilani, Goa
- 2016: Awarded 1st Place in Global Big Pitch for Travel Mate & 1st Place for Global Hackathon for 1-Click Modify

EDUCATION

Goa University, India

MCA (Master of Computer Application)

June 2013 - June 2016

- Graduated with 8.49 CPI

HOBBIES

Dancing

Playing table tennis

Gardening

Organizing cultural events
